EDUCATION

Bachelor's Degree in Software Engineering2022 – Present
Universidad Latina de Costa Rica

WORK EXPERIENCE

Co-founder & DeveloperJan 2025 – Present
Puntus

- Co-founder and full-stack developer of a multi-tenant SaaS loyalty platform for Latin American businesses, live in production
- Built backend (NestJS + TypeScript + PostgreSQL via Prisma) and frontend (Next.js + Tailwind), containerized with Docker
- Shipped a no-code rule engine, real-time analytics and Apple/Google Wallet integrations with AES-256 encryption

Software Department InternMay 2024 – Feb 2025
IDS

- Built two internal Java + MySQL tools: COC Generator (Certificates of Conformity) and AQL Generator (quality control workflows)
- Streamlined document creation processes; provided ongoing technical support, maintenance and feature updates

Video EditorMay 2022 – Jul 2025
O'Sullivan Culinary

- Edited online courses and produced promotional videos, handling full post-production workflow
- Managed video recording and final delivery of multimedia assets for digital platforms

PROJECTS

Puntus

- Multi-tenant SaaS loyalty platform with Apple/Google Wallet integration, no-code rule engine and real-time analytics

Tools: Next.js · NestJS · TypeScript · PostgreSQL · Prisma · Redis · Docker

COC Generator – IDS

- Desktop application for generating Certificates of Conformity, with ongoing support and maintenance

Tools: NetBeans IDE · Figma · MySQL

AQL Generator – IDS

- Quality control application based on AQL international standards; sole developer and support manager

Tools: NetBeans IDE · Figma · MySQL
